Sohaib Abdullah Sadiq

Islamabad, Pakistan | sohaibabdullah709@gmail.com

SUMMARY

Junior System Administrator at the National Telecommunication Corporation (NTC) Data Center, Islamabad, with a Computer Science background and hands-on experience in server operations, infrastructure monitoring, backups and user access management. Brings a software engineering foundation in React and Next.js, with prior work on government digital systems at NITB and production web applications at MFSYS.

EXPERIENCE

Junior System Administrator | National Telecommunication Corporation (NTC) | Jul 2026 - Present

Data Center Operations, NTC Headquarters, G-5/2, Islamabad

- Administer and maintain **Windows and Linux servers** in the NTC Data Center, including installation, configuration, patching and routine health checks.
- Monitor **server, storage and network** infrastructure for uptime, performance and capacity; respond to alerts and escalate critical incidents.
- Perform scheduled **backups and restore tests** to support data integrity and disaster recovery readiness.
- Manage **user accounts, permissions and access control** in line with organizational security policies.
- Support **virtualized environments**: provisioning, resource allocation and maintenance of virtual machines.
- Troubleshoot hardware, OS and connectivity issues, and maintain **documentation** of configurations, maintenance activities and incident logs.

Software Engineer | MFSYS Pvt Ltd | Jul 2025 - Sep 2025 | Islamabad, Pakistan

- Developed responsive front-end applications using **React.js** with a reusable component architecture.
- Built **Next.js** applications using SSR and SSG for performance and SEO optimization.
- Integrated **RESTful APIs** and handled asynchronous data flow with proper error handling.

Web Developer Intern | National Information Technology Board (NITB) | Jul 2024 - Sep 2024 | Islamabad, Pakistan

- Assisted in the development and maintenance of **government digital systems** and web applications.
- Worked with database systems and applied secure development practices, including **authentication and authorization**.
- Supported system testing, debugging and deployment in enterprise environments.

Data Center Intern | National Telecommunication Corporation (NTC) | Jul 2023 - Sep 2023 | Islamabad, Pakistan

- Monitored **server infrastructure and network systems** for uptime and performance.
- Gained hands-on exposure to **virtualization** and basic system administration in a data center environment.
- Assisted with backup operations, system maintenance and review of network configurations and security protocols.

PROJECTS

- **Aurum** | Web and Mobile App | Next.js, Firebase, ShadCN
- **Skill Driving School** | Web App | React.js

SKILLS

- **System Administration:** Windows and Linux Servers, Server and Network Monitoring, Backup and Recovery, Patch Management, User and Access Management
- **Infrastructure:** Data Center Operations, Virtualization, Troubleshooting, Incident Handling, Documentation
- **Development:** JavaScript, React, Next.js, Redux, REST APIs, Firebase
- **UI Libraries:** ShadCN, Material UI, Chakra UI
- **Tools:** Git, Turborepo, Unreal Engine 5 (Blueprints)

EDUCATION

Bachelor of Computer Science | PAF-IAST, Haripur | 2022 - 2026

- **Final Year Project: Operation Black Mirage** | Unreal Engine 5, Blueprints, Niagara
  FPS game on a height-map based Kupwara terrain with procedural foliage, movement, weapons, animations and UI. **Awarded Best Final Year Project.**
